

Use this Cloud icon for representing Internet or WAN in your network diagram

Use Modem illustration for representing a device that modulates an analog carrier signal to encode digital information, and also demodulates such a carrier signal to decode the transmitted information. The goal is to produce a signal that can be transmitted easily and decoded to reproduce the original digital data

A Firewall icon represents a barrier set up in a router to filter packets of data

A Router illustration represents a device that interconnects two or more computer networks, and selectively interchanges packets of data between them

Desktop PC

Workstation

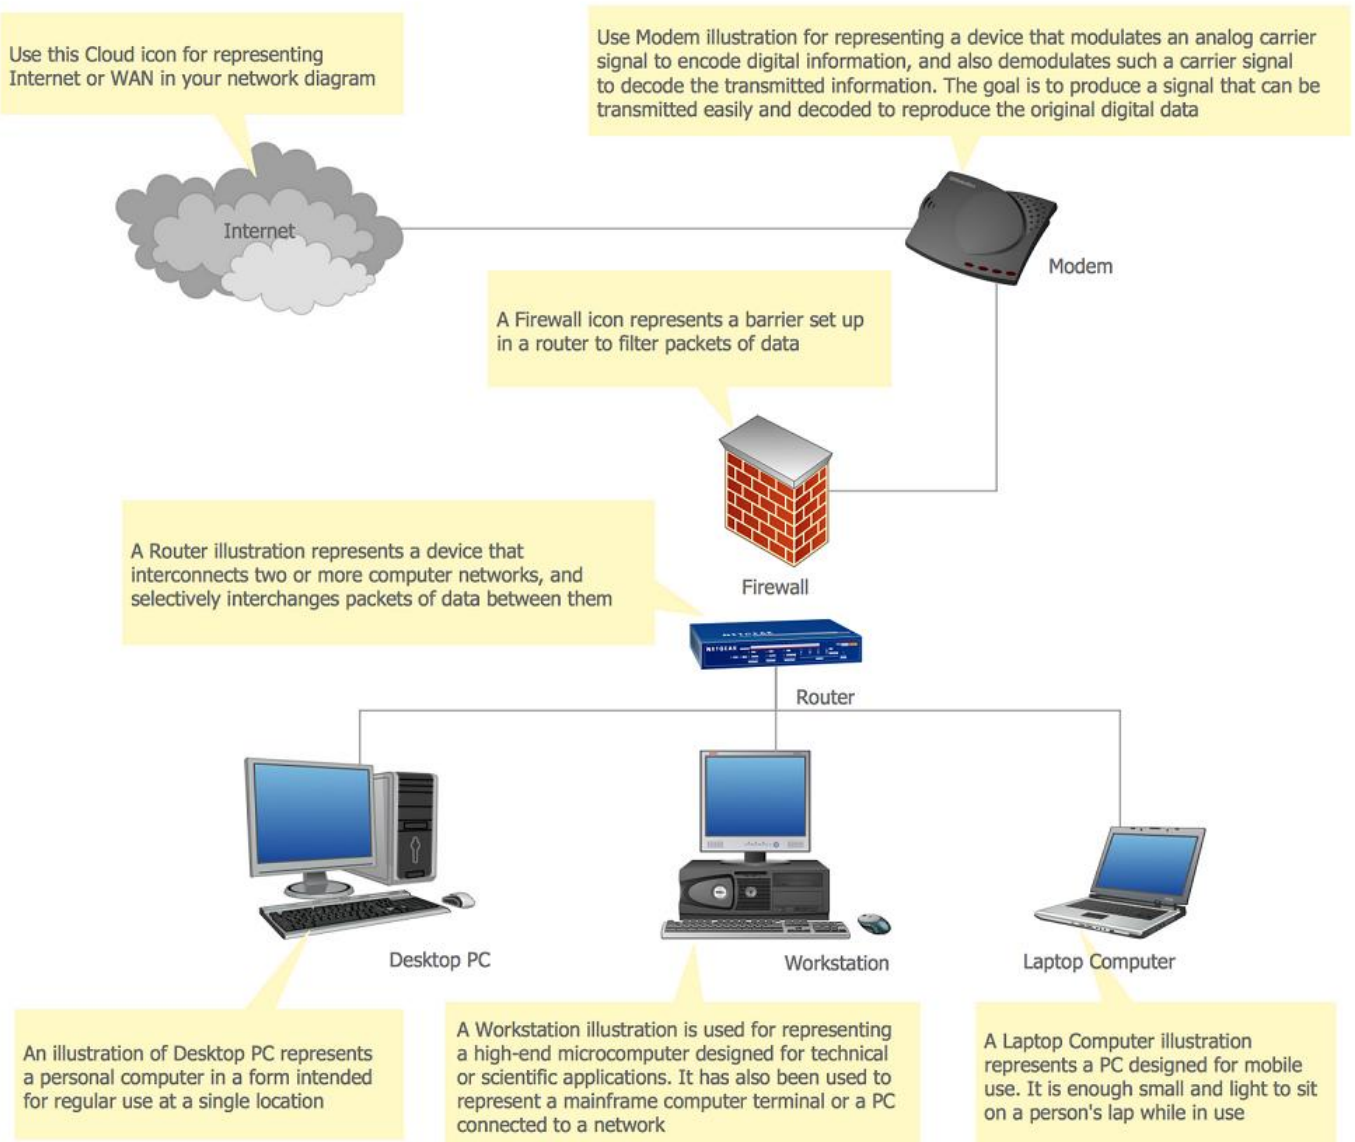

Laptop Computer

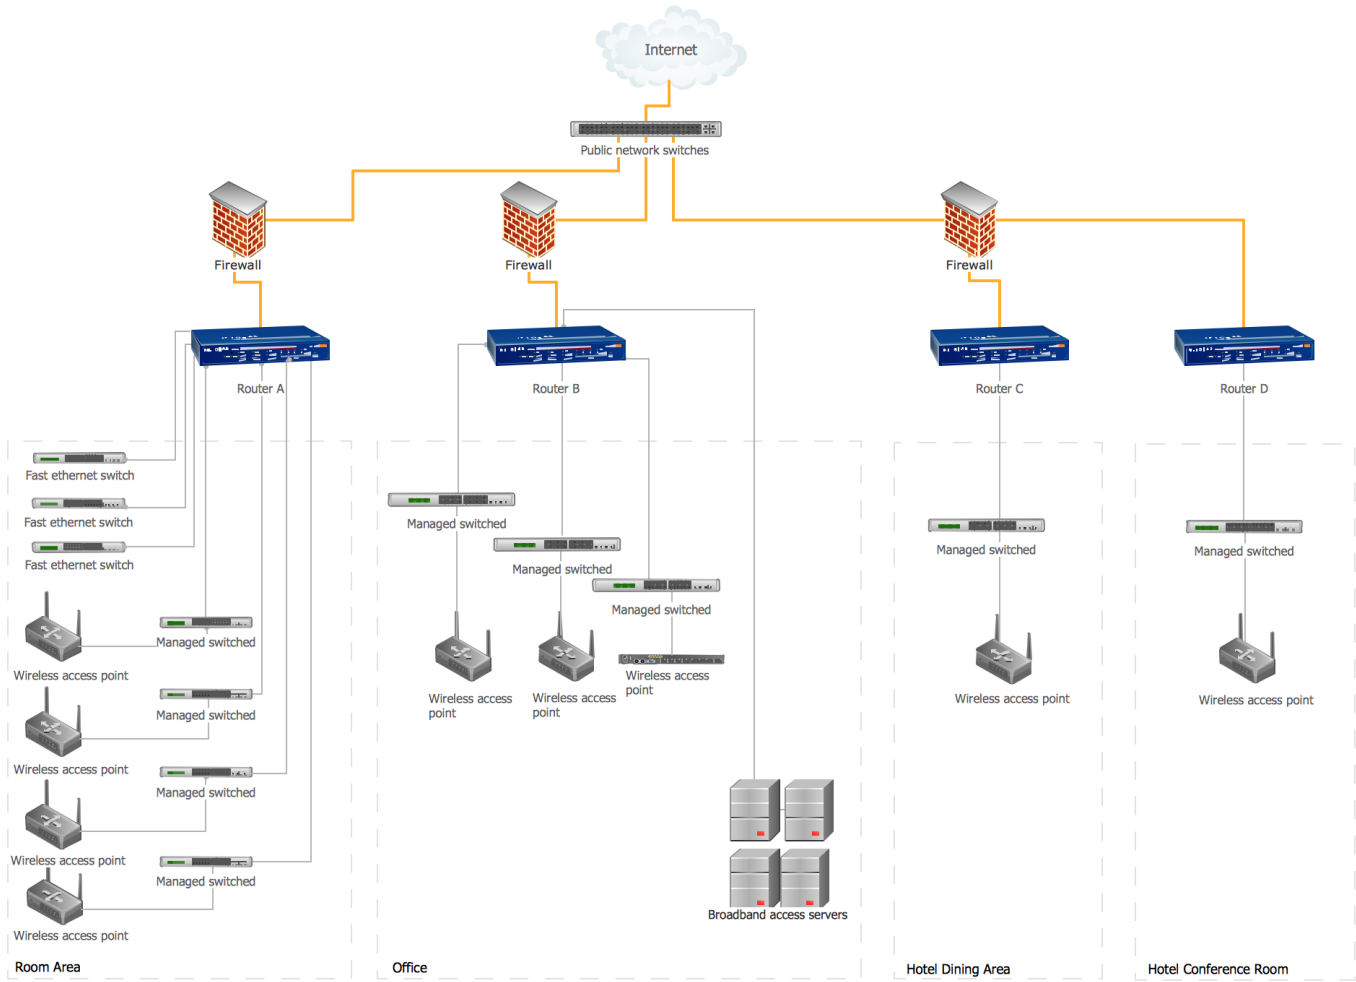

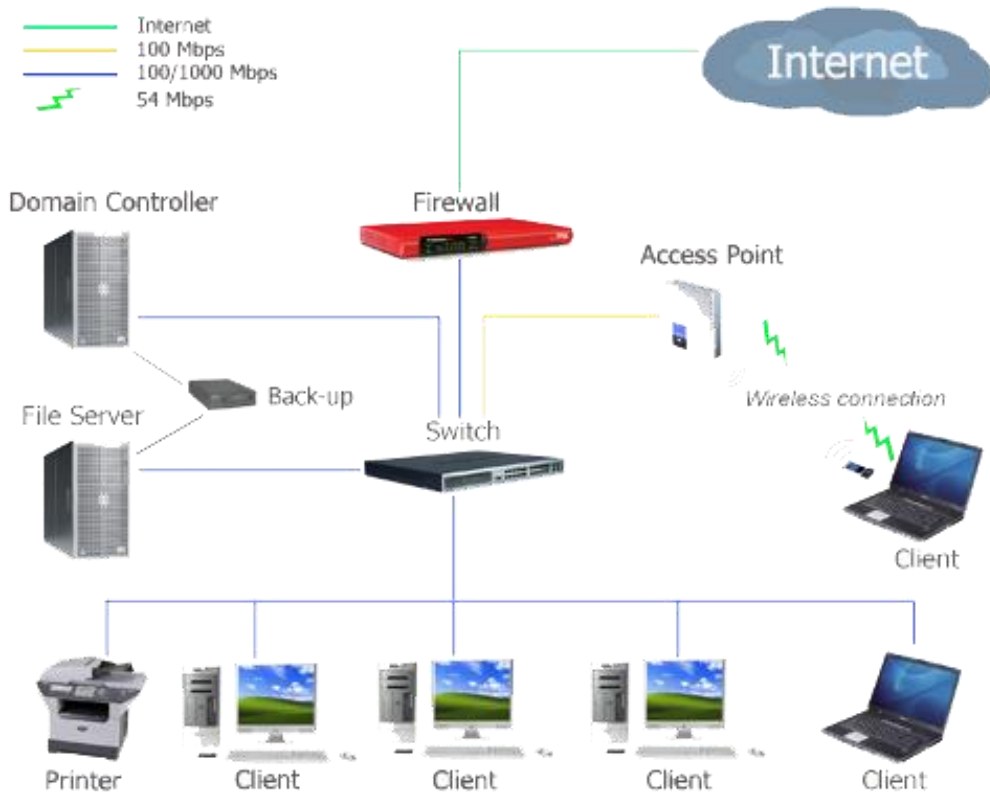

An illustration of Desktop PC represents a personal computer in a form intended for regular use at a single location

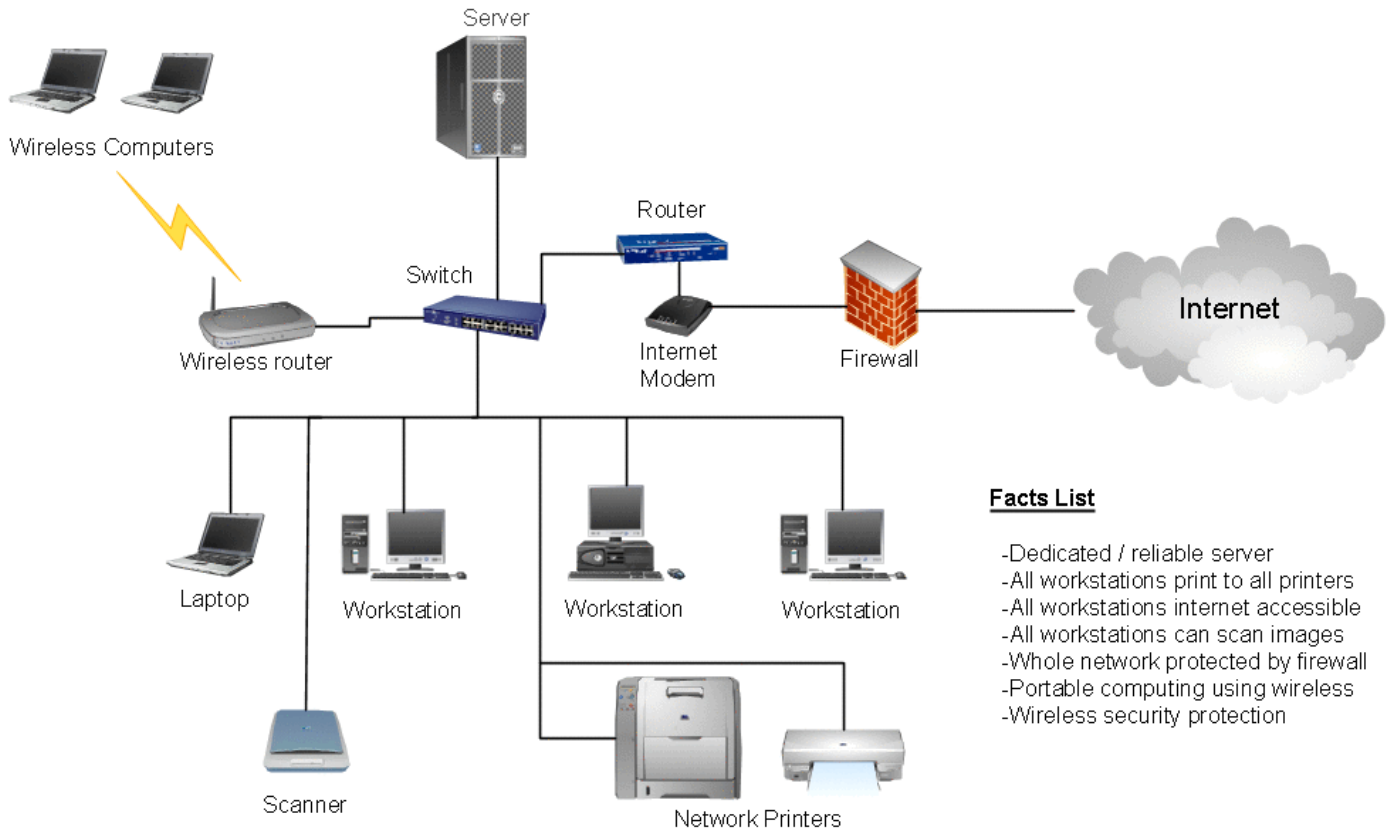

A Workstation illustration is used for representing a high-end microcomputer designed for technical or scientific applications. It has also been used to represent a mainframe computer terminal or a PC connected to a network

A Laptop Computer illustration represents a PC designed for mobile use. It is enough small and light to sit on a person's lap while in use

-  Internet
-  100 Mbps
-  100/1000 Mbps
-  54 Mbps

## Ultra High Performance WLANs
